

SWISS NAVY® GREASE

Q. What is Grease® and how does it work?

A. **Swiss Navy's Grease** is an oil-based lubricant that has a smooth, slick creamy feel. This product decreases uncomfortable intimacy with its ultimate slippery thick, rich texture. Ultimately, Grease makes what seems to be anatomically impossible, possible; resulting in more intense sex play adding more intense pleasure.

Q. How do I use Grease?

A. Whether being stroked by a finger or something larger, it's extremely pleasurable for people to be touched from the inside. Extremists who desire to push the limits during sexual play may find that "bigger is better" in more ways than one! Whether inserting an oversized toy, multiple fingers or even a fist, when done properly, the act can be extremely pleasurable both vaginally and anally. Either way, when experimenting, these sexual adventurers must use an appropriate product that provides slickness unlike any other.

Q. Is internal penetration the only thing you can use Grease for?

A. No. Although Grease is a product designed to be used for extreme stretching, Grease also works perfectly as a masturbation lubricant.

Q. Is the Swiss Navy Grease condom compatible?

A. No, this product is oil based which can break down or compromise a condom matrix.
