

# WOMANIZER™ STARLET

## What is it?

**Womanizer™ Starlet** is a **compact clitoral stimulator™** which is ideal for sextoy beginners wanting to try this form of stimulation.

## What you need to know?

All Womanizer products are made with the revolutionary and unique **Pleasure Air™ Technology**.

## How to demo?

1. Initiate the demo by telling your audience that you are about to be trained on the product that has everyone raving about how easily it brings them to orgasm.
2. Show the audience that the body is made of ABS plastic, and the inner body has a soft touch finish. The stimulation head is made of body-friendly silicone.
3. Start your demo by turning on Womanizer Starlet and showing them the single button which is used to control the Starlet. The button needs to be pressed for two seconds to turn on. The button will glow red around the outside to indicate the power is on and will also change as you switch between intensity levels.
4. Next ask them if they hear anything. The answer might be yes. Explain to them that this sound is the **Pleasure Air Technology** at its lowest of four levels.
5. Then illustrate how **Pleasure Air Technology** works by placing it on the palm of your hand and pointing out the quieter sound that will occur when the Starlet is in use.
  - a. Explain how this technology is the first clitoral stimulator of its kind. Womanizer created it using the revolutionary Pleasure Air Technology developed to, gently and indirectly, stimulate the clitoris. It produces sucking and massaging changes in air pressure, so that orgasm can be reached.
  - b. Mention how some people have experienced issues with some of the similar products in this category because they are solely suction, and have been too intense causing pain and even marking (like a hickey!).
6. Next demonstrate the intensity changes. Click the button once, and the Starlet will increase in intensity. There are four intensities in total. With each level increase, ask them if they hear the louder air pressure, and demonstrate that the sound decreases when in use by placing it on the palm of your hand.

# WOMANIZER™ STARLET

7. Once you have illustrated all four intensity levels, the Starlet will return to the lowest intensity level again. At this time, press and hold the button to demonstrate that this is how to turn the product off. The button needs to be held for two seconds to turn the Starlet off. The red light around the button will turn off as the product turns off.
8. Demonstrate taking off the silicone head of the Starlet. Explain to them that this feature allows the product to be easily cleaned with a damp cloth. Be sure to mention that the product is **splashproof** but not waterproof, so it should not be submerged underwater for cleaning or use. Thus, the best way to clean it is to use a damp cloth.
9. Now that we have gone through the product and how it works, let's go through the remaining features of the product
  - a. It has been made using only body-safe, ABS plastic and silicone. The silicone is hypoallergenic and medical grade.
  - b. The shape of the Womanizer Starlet makes it easy to hold and carry around. The compact size makes it perfect for keeping in your purse.
  - c. Starlet is splashproof
  - d. It comes with a USB Cable with micro USB Charging (show splashproof charging port cover, open to reveal port)
  - e. The charge time is 30 minutes, making it perfect for travelling when you're not in the same place for a long time
  - f. The run time is 30 minutes
  - g. It is available in 3 colours (Snow, Fuchsia, Purple)

## Product Specifications

**Colour:** Snow, Fuchsia, Purple

**Battery Type:** Rechargeable lithium ion

**Material:** Medical grade silicone, body-safe ABS plastic

**Product Dimensions:** 85mm x 50mm x 40mm

**Product Weight:** 70g

**Packaging Dimensions:** 140mm x 140mm x 60mm

**Packaging Weight:** 260g

**Package Contains:** Womanizer™ Starlet, single head, charging cable, manual

**Warranty:** 2 years
